

cVision

Intelligent Resume Screening Platform

“From Resume Collection to Intelligent Hiring Decisions”

Challenges in Modern Resume Screening

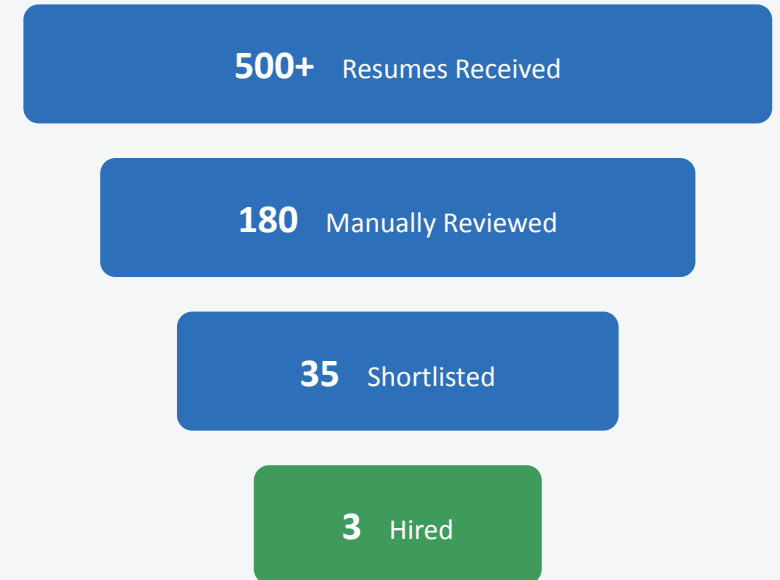

Recruiter Pain Points

- Hundreds of resumes received per job posting
- Manual resume screening is slow and repetitive
- Human bias creeps into shortlisting decisions
- Difficulty matching candidate skills to job requirements
- Time-consuming, multi-step hiring process
- No centralized system to manage candidates

Existing Tools Fall Short

- Keyword-based matching only, no real context
- Fragmented candidate management across tools
- No intelligent ranking of applicants

The Recruitment Bottleneck

Impact

- Longer hiring cycles
- Missed qualified candidates
- Recruiter fatigue & reduced productivity

THE SOLUTION

CVision Solution

A centralized platform that turns resume screening into a structured, transparent, data-informed workflow.

AUTH

Secure Authentication

Recruiter accounts protected end-to-end

DOC

Resume Parsing
